

Civoran Systems, LLC is a founder-led California technology firm helping public agencies improve workflows, reporting, internal tools, digital services, and responsible AI through focused, clearly scoped engagements.

CORE COMPETENCIES

- Custom software & internal tools - Focused web applications, administrative tools, case-management and scheduling workflows.
- Workflow & document automation - Traceable digital requests, reviews, approvals, notifications, forms, and records.
- Data dashboards & reporting - Operational dashboards, recurring reports, structured exports, and decision-support outputs.
- Systems integration & modernization - API integration, data movement, migration, and modernization of repetitive processes.
- Responsible applied AI - Bounded tools for retrieval, review, classification, search, and summarization with human oversight.
- Digital forms & records - Accessible forms, searchable records, organized document workflows, and maintainable handoffs.

FOUNDER EXPERIENCE & SELECTED TECHNICAL WORK

Relevant-experience disclosure: Civoran Systems is a new contracting entity. The examples below reflect work performed by founder Deesha Pathak before or outside Civoran and are not presented as Civoran government-contract past performance.

Infrastructure site-suitability analysis

Designed a repeatable parcel-evaluation and scoring workflow to compare, filter, and prioritize candidate locations for further diligence. Relevant to infrastructure planning, land-use analysis, and transparent location-based prioritization.

Mobile 3D capture & visualization platform

Founded and developed a multi-component product spanning native iOS capture, ARKit/TrueDepth, mesh processing, web visualization, backend services, job tracking, and technical documentation.

Validated computational analysis workflow

Built a configurable Python ingest-to-export prototype with scoring, synthetic known controls, automated validation gates, repeatable stages, and structured reporting.

Human-in-the-loop AI workflow

Designed a staged process separating planning, generation, automated validation, human review, approval, and export for accountable AI-assisted operations.

COMPANY DATA

Legal name

Civoran Systems, LLC

Business type

California limited liability company

Certification

California Certified Small Business
Certification ID 2054005

Location

California, United States

Primary market

California state and local public agencies

Delivery model

Founder-led, fixed-scope engagements

DIFFERENTIATORS

- Direct founder involvement from discovery through delivery
- Hands-on product and full-stack software-building experience
- Defined deliverables, acceptance criteria, schedule, and pricing
- Accessibility-conscious, data-minimizing, human-reviewed delivery
- Documentation, training, and maintainable handoff
